AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

Claim 1 (currently amended) A fuse holder system suitable for mounting in an automobile main electrical junction box and further ~~which, being specially conceived to integrate~~ suitable for mounting the fuses involved in periodic controls or diagnoses of vehicle safety systems, such as including ABS, airbags, brake controls and the like or others, is characterised in that it consists of comprising: a fuse holder module body (1) provided with a body capable of housing ~~the different~~ a plurality of fuses (3) and (5) having different configurations; (3-5) involved, which for safety reasons must be associated but with the possibility said fuses (3) and (5) capable of being connected and disconnected at will; ; said fuse holder module body (1) having two housings (2) and (4) for the said fuses (3) and (5), with and a cover (7) for closure of said housings (2) and (4), ; and with further having a fixing element (10) fixing it said fuse holder module body (1) to the said automobile main electric junction box of the vehicle.

Claim 2 (currently amended) A fuse holder system according to claim 1, ~~characterised~~ characterized ~~in that the said~~ housings (2) and (4) are being variable in number and configuration, according to the number and configurations of fuses (3) and (5) ~~involved and to the equal or different features thereof.~~

Claim 3 (currently amended) A fuse holder system according to ~~previous~~ claim 1, ~~characterised~~ characterized ~~in that the said~~ cover (7) for the covering said housings (2) and (4) of ~~the said~~ said fuse holder module body (1) forms a single piece therewith, and is joined therewith through a pivoting line determining a joint or a swinging hinge (8), said cover (7) being provided with fixing means (9) for fixing it to ~~the said~~ said fuse holder module body (1) in a closed position.
